SUMMARY

Junior Developer aspiring to build innovative and efficient software solutions. Passionate about web development, problem-solving, and continuous learning. Proficient in front-end and back-end technologies, with experience in JavaScript, React, Node.js, and database management. Eager to contribute to dynamic teams and grow as a developer.

SKILLS

Front-End: React, Next.js, Bootstrap, CSS, HTML, CSS

Back-End: Node.js, Flask, Python

Databases: PostgreSQL, SQLite

Version Control: Git, GitHub,

Tools & Platforms: Firebase, DBeaver, Postman

Other: REST APIs, Authentication (JWT, Firebase Auth), Debugging & Troubleshooting

EXPERIENCE

Self-Led Projects | Personal & Academic Work

- Developed a full-stack blog portfolio using Next.js, Bootstrap, and Firebase for authentication and data storage.
- Built a task management app using React, and Flask, implementing user authentication and CRUD operations.
- Designed and managed databases with PostgreSQL and DBeaver, optimizing queries for efficiency.

Open Source Contributions | GitHub

- Contributed to open-source projects, fixing bugs and adding features to JavaScript and Python repositories.
- Collaborated with developers using Git, GitHub, and Agile methodologies.
- Completed Web Development Bootcamp covering React, Flask, PostgreSQL, and API integration.
- Built multiple full-stack applications as part of coursework.

PROJECTS

Blog Portfolio Website (Next.js, Bootstrap CSS, Firebase)

- Developed a personal blog and portfolio showcasing projects and articles.
- Integrated Firebase authentication for user login and content management.
- Used Next.js for SSR (Server-Side Rendering) to optimize performance.

Task Management App (React, Flask, PostgreSQL)

- Built a task-tracking web app allowing users to create, update, and delete tasks.
- Implemented user authentication and authorization using JWT.
- Designed a PostgreSQL database and used Flask for the backend API.

E-commerce API (Flask, SQLAlchemy, DBeaver,)

- Created a RESTful e-commerce backend API for managing products, users, and orders.

- Implemented secure payment processing using the Stripe API.
- Designed and tested database models with DBeaver and SQLAlchemy.

EDUCATION

Moringa School

- Intensive training in **Full-Stack Web Development** using **Python, JavaScript, Flask, React, Postgres, and SQL**.
- Hands-on experience with **building web applications, APIs, and databases**.
- Collaborative projects simulating real-world software development.
